Lo que deja de pasar con HRS

- ✓ El curso vencido que nadie vio hasta la auditoría
- ✓ El diploma dudoso que nadie puede verificar
- ✓ El Excel de vencimientos que ya nadie mantiene
- ✓ Las planillas de instrucción perdidas en carpetas
- ✓ La recertificación programada a última hora
- ✓ La evidencia dispersa cuando llega el auditor

La auditoría que se responde sola

HRS evalúa automáticamente los puntos de cumplimiento ISAGO contra tus propios registros: habilitación por cargo, recurrencias, instructores y documentación. El score te dice dónde estás parado antes de que te lo pregunten.

Competencias, no solo asistencia

Además de los cursos, HRS registra la evaluación de competencias por cargo con niveles y evidencia — el estándar que separa 'tomó el curso' de 'sabe hacer el trabajo'.

What stops happening with HRS

- ✓ The expired course nobody saw until the audit
- ✓ The dubious diploma nobody can verify
- ✓ The expiry spreadsheet nobody maintains
- ✓ Instruction records lost in binders
- ✓ The recertification scheduled last-minute
- ✓ Scattered evidence when the auditor arrives

The audit that answers itself

HRS automatically evaluates ISAGO compliance checkpoints against your own records: qualification per position, recurrences, instructors and documentation. The score tells you where you stand before anyone asks.

Competencies, not just attendance

Beyond courses, HRS records per-position competency assessment with levels and evidence — the standard that separates 'took the course' from 'can do the job'.

- ✓ O curso vencido que ninguém viu até a auditoria

A auditoria que se responde sozinha

O HRS avalia automaticamente os pontos de conformidade ISAGO contra seus próprios registros: habilitação por cargo, recorrências, instrutores e documentação. O score diz onde você está antes que perguntem.

Competências, não só presença

Além dos cursos, o HRS registra a avaliação de competências por cargo com níveis e evidência — o padrão que separa 'fez o curso' de 'sabe fazer o trabalho'.
